

The English House
La academia de inglés para todos

Values Statement

COMMITMENT TO OUR CLIENTS:

Students and parents

Affective Learning

We care about our students. We believe that each student is valuable and unique and therefore seek to care for the needs of the individual both academically and beyond the classroom. Within the academy we desire to create a safe, comfortable environment conducive to learning.

Pro-active Learning

We believe that teaching is so much more than imparting information. Our desire is to foster a positive attitude towards English. We encourage our students to discover language for themselves and take an active interest in their own development.

COMMITMENT TO OUR TEAM:

Administration, teachers and management

We believe in a working relationship based on trust and communication. We strive to create a continuous learning environment that allows us all to grow both professionally and as individuals. As a team we seek to serve each other and share our ideas and resources in order to create a friendly and enjoyable working atmosphere in which the needs of each member of staff are considered.

COMMITMENT TO OUR COMMUNITY:

Los Bermejales

As an academy we seek to be more than just a business or service. We work to build community both within the academy and in our participation and contribution to the wider community of Los Bermejales. Outside the academy we look to make a valuable contribution to the community by organising free events that bring people together to enjoy English in our neighbourhood.
